

FlyRibbon 400

Glue roll for control of flying insects.

Typical applications of use are:

- Control of flies in cow and pig stables
- Control of flies in chicken farms
- Use in stable and other agri areas
- Or any other area where there is a strong presence of flies

FlyRibbon

The fly ribbon can be used in areas where the nuisance of flies is high.

The FlyRibbon roll is executed with 400 meters of fly ribbon. Simply attach the FlyRibbon by means of a staple or a nail on/under the ceiling and start rolling away. Once the fly ribbon is covered with flies, simply detach the fly ribbon from the

ceiling and replace it for a new strip.

The fly ribbon is easy and safe to use; after use it can be disposed of as non-chemical waste.

Typical applications of use are:

- Control of flies in cow and pig stables
- Control of flies in chicken farms
- Use in stable and other agri areas
- Or any other area where there is a strong presence of flies

Easy and effective control of those insects which you rather not have around your premises.

The FlyRibbon can be used as a separate system or in combination with almost any available roll system.

Specifications:

Description	Glue roll for control of flying insects
Length	400 meters
Width	5 mm
For use in	Control of flying insects in stables / areas
Color board	Blue (RAL 5005)
Water resistant	For indoor and outdoor use
Counting grid	No
Operational time	Commonly 2 months under normal conditions
Storage time	Max 48 months
Storage temperature	Max 30 degrees Celsius
Attractant	None
Weight per roll	1,15 kg
Colli per outer box	8 pieces
Product dimensions	200 x 90 (Diameter x Width in mm)
Product box dimensions	205 x 205 x 95 (L x W x D in mm)
Disposal instructions	None specific
Environmental aspects	None
Regulatory aspects	None
